"Authoritative, thorough, and scrupulous, this book pleads for cultural diversity while clearly demonstrating the social, political, and aesthetic dangers inherent in programmatic definition. This is a rewarding book, and necessary."

- Peter Quartermain, Professor Emeritus of English, The University of British Columbia, Canada, and author of *Stubborn Poetries: Poetic Facticity and the Avant-Garde*

"Chambers carefully cuts back the myths which have grown dense over landmarks in twentieth century English poetry. Through a nuanced reading of the 'little magazines' and anthologies that launched, affirmed, discussed, and refuted the poetry of these groupings, Chambers not only adds to our understanding of English literary culture but also demonstrates how important it is to understand literary culture as a culture of the little magazine."

- Richard Price, author of *British Poetry Magazines 1914-2000: A History and Bibliography of "Little Magazines"*

"Timely and incisive, wide-ranging but strategically focused, this book is an important intervention in the field of modernist periodical studies. Its rich expositions of the 'periodical formations' generated in late modernist Britain expose the intricate interconnections between multiple spheres of cultural production, and the vexed position of poetry in debates about national identity in the interwar period. This is a compelling revisionist account of modernist print culture - and one executed with considerable flair."

- Eric White, Senior Lecturer of American Literature, Oxford Brookes University, UK

"After *Modernism, Periodicals, and Cultural Poetics*, it will be much harder to ignore the mid-century in histories of British poetry."

- Keith Tuma, Professor of English, Miami University, USA and author of *Fishing by Obstinate Isles: Modern and Postmodern British Poetry and American Readers*

### About the book

*Modernism, Periodicals, and Cultural Poetics* addresses how late modernist poetry in Britain tended toward a culturalist expression and importantly how this occurred within the pages of literary periodicals. 'Periodical formations' describe networks of exchange within and between different literary periodicals that condition the types of poetry published and the kinds of poetic discourse that come to predominate. A re-emphasis on periodical production following the publication of Eliot's *The Waste Land* and culminating with the pre-Movement magazines of the 1940's illustrates a complex and diverse series of debates and negotiations about not only the tradition of English poetry and its role in contemporaneous form, but also how poetry of the period related to the avant-garde trends prominent on the European continent and in America. By focusing on periodical formations, the development of what are now accepted understandings of the period can be better addressed, and certain lasting assumptions can be demythologized.
